Dennis Nleya

Frontend Developer

hello@dennisnleya.ca · dennisnleya.ca · github.com/dn3000 · linkedin.com/in/dennis-nleya

Greater Toronto Area, ON, Canada · Open to remote (US)

SUMMARY

Frontend developer with 8 years building production web apps, focused on React, Next.js and TypeScript, design systems and accessibility. I build shared component libraries, ship accessible UI to WCAG 2.2 AA, and integrate cleanly with REST APIs and backend data models. Full-stack background across health, agriculture and hospitality products in four countries, including 15 months remote with a US team.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion, Recharts, design systems, responsive UI
Accessibility & Practices	WCAG 2.2 AA accessibility, component libraries, code review, PWA, GDPR
Backend & Data	Supabase, Supabase Auth, PostgreSQL, Firebase / Firestore, Node.js, REST APIs
AI & ML	Anthropic Claude API (LLM product features), prompt & context design, AI-assisted agentic development, scikit-learn (Random Forest), Streamlit
Languages	TypeScript, JavaScript, Python, SQL, HTML, CSS
Platform & Tools	Vercel, Git / GitHub, CI/CD, Sanity CMS, Resend

EXPERIENCE

Independent Full-Stack Developer Sep 2025 – Present

Independent product & freelance work · Ontario, Canada

- Built a nine-phase respite-care booking platform (CareBreak) with a full compliance layer — DBS verification tracking and Care Act safeguarding taxonomy — to WCAG 2.2 AA and GDPR self-serve standards.
- Shipped Progressive Web Apps with offline support, dark mode and internationalisation, deployed on Vercel.

Frontend Developer May 2024 – Aug 2025

Lovejoy Health · Remote (United States)

- Built and maintained a shared component library and design system, cutting duplicate UI work across the product.
- Shipped features for a production health app with a US team across time zones, supporting ~300 users, with accessibility improvements across core journeys.

Frontend Developer Feb 2022 – Feb 2024

Deep Learning Cafe · South Africa

- Migrated legacy client sites to modern stacks, cutting load times from 3s+ to 1.1s.
- Built internal dashboards and admin tooling giving non-technical staff self-serve data access previously gated behind developers.

Junior Web Developer Jan 2018 – Nov 2021

Horlobyte Systems (@horlobyte) · Zimbabwe

- Built responsive marketing sites, landing pages and e-commerce storefronts from design handoff to launch, including catalogues and checkout.
- Set up and maintained three Shopify storefronts while running the social-media ad campaigns behind them.

SELECTED PROJECTS

- **Zanith CHC** (Next.js · TypeScript · Supabase · Tailwind). Multi-step enquiry intake with magic-link save-and-resume and a staff dashboard; UK health-data compliance — Supabase Postgres (London region), signed-URL storage, Supabase Auth + 2FA, WCAG 2.2 AA.
- **CareBreak** (Next.js 15 · TypeScript · Supabase · Tailwind). Nine-phase carer–worker booking platform to WCAG 2.2 AA + GDPR; DBS verification and Care Act safeguarding compliance layer; PWA, dark mode, i18n.
- **AEN** (React · Firebase / Firestore · Recharts · PWA). Offline-capable PWA linking smallholder farmers to markets and pricing; farmer listings, admin dashboard, Recharts price index, Open-Meteo live conditions.
- **Sango** (Next.js · TypeScript · Firebase · Tailwind · Claude API). Two-app monorepo (client + operator dashboard) on Firebase; Claude API drafts replies across a unified IG/FB/TikTok social inbox and generates captions, plus review monitoring and scheduling.

EDUCATION & LEARNING

Self-taught software engineer — 8 years building and shipping production software, on the job.
