Dennis Nleya

Front-End Developer

hello@dennisnleya.ca · dennisnleya.ca · github.com/dn3000 · linkedin.com/in/dennis-nleya
Greater Toronto Area, ON, Canada · Open to remote (US)

SUMMARY

Front-end developer, 8 years, who ships the whole feature — designs in Figma, builds in React, Next.js and TypeScript, and takes it through auth, data and deploy when needed. Focused on accessible, fast interfaces: WCAG 2.2 AA, keyboard and screen-reader support, sub-2s loads, zero layout shift. I've built compliance-heavy UK care/health platforms, an offline-first agri PWA, and production LLM features across four countries — including 15 months remote with a US team.

TECHNICAL SKILLS

Front-End	React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Radix UI, React Router, React Hook Form, Zod, TanStack Query, Framer Motion, Recharts
Design & A11y	Figma (design-to-React), Adobe Creative Suite, UI/UX, brand & marketing design · WCAG 2.2 AA, Core Web Vitals, PWA
Back-End & Data	Supabase (Auth, PostgreSQL), Firebase / Firestore, Node.js, REST APIs
CMS / E-com & AI	WordPress (Elementor, WooCommerce), Shopify, Sanity · Anthropic Claude API, Claude Code, Gemini
Testing & Tooling	Vitest, React Testing Library, Git / GitHub, Docker, CI/CD, Agile / Scrum, Vercel

EXPERIENCE

Independent Front-End Developer Sep 2025 – Present
Independent product & freelance work · Ontario, Canada

- Design and ship front-ends end to end — Figma to pixel-accurate React & Next.js — for care, health and hospitality platforms, owning the UI and accessibility plus the auth, data and deploy behind them.
- Build to WCAG 2.2 AA with keyboard and screen-reader support; sub-2s LCP and zero cumulative layout shift across builds.
- Shipped production LLM features with the Anthropic Claude API — AI-drafted messaging and one-click content generation in an operator dashboard.

Front-End Developer May 2024 – Aug 2025
Lovejoy Health · Remote (United States)

- Shipped and integrated UI for a production mental-health platform serving **20+ care providers and 1,000+ patients** across role-based portals (individuals, providers, organizations) — REST APIs and data models with full loading, error and empty states, remote with a US team.
- Built the majority of the product's screens and components — a shared UI across a WordPress/Elementor marketing layer and a React app — as a component library and design system that cut duplicate implementation.
- Improved accessibility across core patient and provider journeys — keyboard navigation, visible focus states and screen-reader labelling — toward WCAG 2.2 AA.

Front-End Developer Feb 2022 – Feb 2024
Deep Learning Café · South Africa

- Built responsive front-end modules and dashboards for AI-powered client products across industries (legal, mining and more) — data-heavy UIs, admin panels and user-specific workflows in React, Next.js and TypeScript.
- Rebuilt and migrated legacy client sites onto modern React / Next.js stacks, roughly halving page-load times (3s+ to ~1.1s).

Junior Web Developer Jan 2018 – Nov 2021
Horlobyte Systems (@horlobyte) · Zimbabwe

- Hand-coded and built 25+ responsive landing pages and marketing sites solo — HTML/CSS and WordPress (custom themes, WooCommerce) — from design handoff to launch.
- Ran clients' Shopify and WooCommerce storefronts end to end (themes, products, checkout), designed the marketing creative, and managed their social-media ad campaigns on $50–$500/month budgets.

SELECTED PROJECTS

- **Zanith CHC** — NHS Continuing Healthcare platform, UK (Next.js · TypeScript · Supabase). Enquiry intake with magic-link save-and-resume and a staff dashboard; ~0.7s LCP, zero CLS, WCAG 2.2 AA, UK data-residency, 2FA.
- **CareBreak** — respite-care booking, UK care sector (Next.js 15 · TypeScript · Supabase). Nine-phase carer–worker booking to WCAG 2.2 AA + GDPR; DBS / Care Act compliance; PWA, dark mode, i18n.
- **AEN** — agricultural marketplace PWA, Zimbabwe (React · Firebase · Recharts · PWA). Offline-first; farmer listings, admin dashboard, Recharts price index, Open-Meteo live data; 60+ images, every one with alt text.

EDUCATION & LEARNING

Self-taught front-end developer — eight years building and shipping production software.
